

Tianyu He

Full-Stack Developer & AI Specialist

✉ tianyuu10@gmail.com ☎ +34 673197300 📍 08009 spain.bcn

Profile

Former TV Director turned Full-Stack Developer, specializing in React, Node.js, and Python. Expert in leveraging AI agents and RAG pipelines to automate complex processes. Unique experience in developing internal infrastructure for high-pressure production environments. Passionate about building reliable developer productivity tools and high-fidelity web platforms that bridge the gap between sophisticated backend logic and seamless UI/UX.

Work experience

Production Engineer & TV Director, Edikara Co., Ltd.	2022 – 2025 Japan
• Internal Tool Development: Designed and maintained an internal web-based asset management system built with Next.js. Improved team coordination and workflow efficiency by 30% through custom API integrations and database optimization. • Creative Content Engineering: Directed and produced major TV programs (e.g., “Can I Follow You Home?”). Managed the entire production lifecycle, including concept development, field interviews, and high-quality video editing. • Technical Proficiency: Leveraged Adobe Premiere Pro and After Effects for visual storytelling, while simultaneously bridging the gap between creative content and technical infrastructure. • Project Leadership: Coordinated multi-disciplinary teams across tight deadlines, ensuring production quality and technical reliability for national broadcast.	

Education

Barcelona Code School, Full-stack developer	2025 – 2025 Barcelona, Spain
Studied responsive web and mobile application development, including full-stack development, API integration, databases, and deployment.	
Nihon University, Master of Fine Arts (MFA)	2020 – 2022 Tokyo, Japan
Used Blender for 3D modeling and scene creation, demonstrating hands-on understanding of visual systems and technical implementation.	
East China Normal University, Bachelor economics	2014 – 2018 Shanghai, China

Technical Skills

Languages TypeScript, JavaScript (ES6+), Go, Python, HTML5, CSS3/Sass	Frontend React, Next.js, React Native, Redux, Ant Design, Tailwind CSS.
Backend & Cloud Node.js, Express, Go (Gin/Fiber), MongoDB, SQL (PostgreSQL), RESTful APIs.	AI & Automation n8n, LLM Orchestration, RAG Pipelines, OpenAI API, Vector Databases (Pinecone/Supabase).
